

BUSINESS FOUNDATIONS O.E.

Juneau, e-Learning

Business principles fuel our economy. In this 3 course occupational endorsement (OE), students are introduced to a survey of the core business functions and role in our society, and then go on to build foundational skills in the key areas of accounting and human resources. This OE is a good entry point for individuals interested in exploring the study of business, but are unsure of what specific area to focus on. Additionally, this is a useful, strategic complement to the study of other disciplines for purposes of career readiness and intentions for future advancement into organizational leadership roles.
